

I find the idea of punishing all broadcasters with this recording requirement to be extreme and out of touch. My family has operated stations for over thirty years and we have never had a complaint filed against us that this requirement would solve. I do not have a problem with addressing broadcasters who operate outside their community standards through forfeitures and other restrictions and requirements such as recording. Why punish the 99% of us that have and will continue to operate in a manner pleasing to our communities? Take some time to think about this. The proposal tries to address a problem that doesn't really exist.
